## About the Fund

The Accelerate Carbon-Negative Bitcoin ETF (TSX: ABTC or ABTC.U) seeks to provide investors with exposure to the performance of bitcoin by investing in CME bitcoin futures. Accelerate intends to sequester over 100% of the estimated carbon dioxide emissions attributable to bitcoin transactions that ABTC is indirectly exposed to by funding decarbonization initiatives including its global tree-planting program.

## Investment Process

To provide investors exposure to the performance of bitcoin, the fund invests directly in CME bitcoin futures,

- CME Bitcoin Futures are designed to provide exposure to the performance of bitcoin and are traded in USD
- CME Bitcoin Futures are listed and cleared on the Chicago Mercantile Exchange, a U.S.-registered designated contract market and derivatives clearing organization
- The trading and clearing of CME Bitcoin Futures is regulated by the Commodity Trading Commission, regulatory body with exclusive jurisdiction over U.S. bitcoin futures markets

## Who is the ETF for?

- Investors who want exposure to the performance of bitcoin in an eco-friendly way; and
- Can tolerate a high level of investment risk

## How Does it Work?

- ABTC holds bitcoin derivatives
- Implements a decarbonization initiative through a global tree-planting campaign
- For every CAD \$1,000 invested, an estimated 1 net tonne of carbon emissions is sequestered

## Investment Growth

Time Period: August 31, 2021 to April 30, 2023

DISCLAIMER: ABTC provides exposure to bitcoin through futures and saves the planet by supporting decarbonisation initiatives. See our prospectus for further details. 2022	-15.7%	8.8%	7.1%	-14.2%	-18.9%	-39.4%	26.6%	-13.9%	2.2%	3.2%	-14.8%	-2.0%	-60.2%
2021									-8.0%	38.5%	-6.2%	-21.9%	-6.6%

## What Makes ABTC Eco-friendly?

Bitcoin miners are expected to consume roughly 130 Terawatt-hours of energy (TWh), which is approximately 0.6% of the global electricity consumption. ABTC is green for four reasons:

### 1. No Blockchain

We trade bitcoin futures, which consumes a fraction of the energy of mining bitcoin. Each bitcoin bought through futures is one that doesn't need to be mined.

### 2. Decarbonization Initiative

We have a tree-planting campaign to neutralize carbon emissions and help fight climate change. Up to 10% of our management fee will be allocated to our annual tree-planting campaign.

### 3. Independently Verified

We work closely with a third-party sustainability consultant, helping us efficiently track energy use and emissions, allowing us and our investors to achieve a sustainable investing experience.

### 4. Professionally Managed

We use a tree-planting management platform that enables us to monitor projects effectively. It is designed specifically to manage large-scale projects, allowing us to provide data to clients regarding the status of their sustainability efforts.

## ABTC Can Benefit You In Two Ways:

1. It can diversify your investment portfolio

2. You can help fight climate change by investing portfolio in bitcoin

Visit [www.InvestABTC.com](http://www.InvestABTC.com) to calculate how many trees your investment will plant or how much carbon footprint is offset by your investment.
