ATSX Highlights

ATSX gained 6.9% in August, compared to the benchmark S&P/TSX 60's 4.8% return.

The Fund's monthly return was supported by positive Canadian multi-factor portfolio performance for the month. While the long-short value and quality portfolios generated a negative return, as overvalued and low-quality stocks outperformed undervalued and high-quality equities, this was more than offset by the positive performance contribution of the long-short operating momentum and trend portfolios.

Top Fund contributors for the month include long positions in Kinross Gold, Barrick Mining, and Pan American Silver. Top Fund detractors include short positions in Equinox Gold, Capstone Copper, and NexGen Energy.

About the Fund

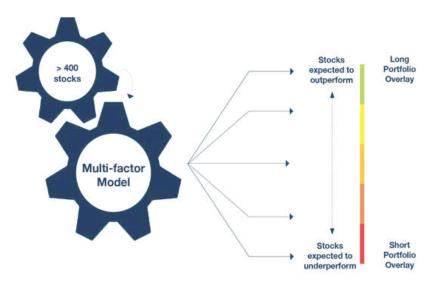

The Accelerate Canadian Long Short Equity Fund (TSX: ATSX) is a systematic 150-50 long-short equity fund that seeks to outperform the S&P/TSX 60.

Investment Objectives

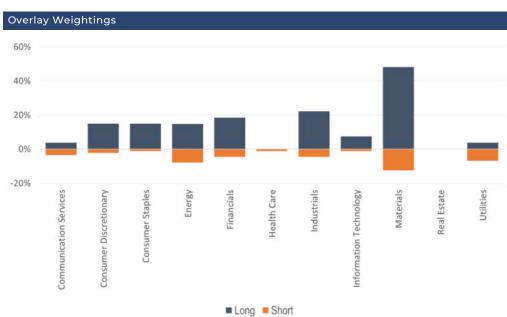

- Outperform the broad Canadian equity index
- Provide volatility in-line with the broad Canadian equity index

Investment Process

ATSX targets consistent long-term capital appreciation with a compelling risk-adjusted rate of return. The fund utilizes Accelerate's proven multi-factor ranking system to construct a portfolio that is long the most attractive stocks and short the least attractive stocks in Canada. The portfolio is rebalanced on a monthly basis. The long portfolio is up to 150% of NAV and the short portfolio is up to -50% of NAV.
