

INCM Highlights

INCM declined by -7.5% in a challenging month for liquid private credit.

Significant negative sentiment has overwhelmed the listed BDC market, despite underlying credit conditions being generally satisfactory, causing NAV discounts to widen to levels wider than experienced at the April lows.

Currently, INCM is allocated to 20 listed private credit funds, which hold more than 5,000 loans and investments. Of these loans, 83.9% are secured and 90.3% are floating rate, with a weighted average yield of 12.9%. INCM currently trades at a -16.6% discount to the underlying net asset value of its loan pools.
