Accelerate Absolute Return Fund

Annual Management Report of Fund Performance

For the period ended December 31, 2025

Investment Objective and Strategies

The investment objective of the Accelerate Absolute Return Fund (the “Fund” or “HDGE”) is to seek to achieve long-term capital appreciation and a superior risk-adjusted return relative to the broader Canadian equity market. HDGE seeks to outperform the Canadian equity market over the long term with lower volatility by investing primarily in listed equity securities that are expected to outperform this market, while selling short certain listed equity securities that are expected to underperform this market. The aggregate market value of the securities sold short will not exceed the limits permitted under applicable securities legislation.

In order to achieve its investment objective, HDGE engages in a systematic, long-short equity investment strategy by investing primarily in long and short positions of equity securities that are listed on an exchange or marketplace in Canada or the U.S. Security selection of the long and short portfolios is driven by an integrated multi-factor approach, consistent with empirical data and financial theory, based on factors that include value, quality, price momentum, operational momentum and trend. The Portfolio Manager applies its proprietary multifactor model to the Canadian and U.S. listed equity markets and selects the long portfolio from the top 10%, and the short portfolio from the bottom 10%, of the equities generated by this model.

HDGE uses the cash generated from its short positions to purchase additional long positions. As a result, HDGE is expected to have an approximately 110% exposure to the long portfolio and up to 50% exposure to the short portfolio, resulting in an approximately 60% net long equity exposure. While the short positions create leverage by increasing the long portfolio exposure, these positions help to hedge the increased market risk associated with the leveraged portion of the long portfolio. The aggregate market value of securities sold short by HDGE will not exceed 50% of HDGE's NAV.

Risk

The risks associated with an investment in the Funds are described in the prospectus. During the period that began January 1, 2025 and ended December 31, 2025, there have been no changes to the Fund that materially affected the risk level of the Fund.

Results of Operations

The Fund was launched on May 3, 2019, and the net asset value of the Fund was \$41.1 million as at December 31, 2025.

Leverage

The aggregate market exposure of all instruments held directly or indirectly by HDGE, calculated daily on a mark-to-market basis, can exceed the net asset value of HDGE, and can exceed the amount of cash and securities held as margin on deposit to support the derivatives trading activities of the Fund. Under normal market conditions, the amount of leverage used, directly or indirectly, by the Fund, expressed as a ratio of total underlying notional value of the securities and/or financial derivative positions of HDGE divided by the net assets of HDGE, will be rebalanced approximately monthly to target 2:1.

The table below states the minimum and maximum leverage levels for the Fund for the period ended December 31, 2025; the Fund's leverage at the end of the reporting period; and, approximately what that leverage represents as a percentage of the Fund's net assets.

Reporting Period	Minimum Leverage	Maximum Leverage	Leverage at end of Reporting Period	Approximate Percentage of Net Assets
December 31, 2025	1.44	1.66	1.57	157%

Market Risk

In February 2025, the United States announced three executive orders directing the United States to impose new tariffs on imports originating from Canada, Mexico, and China. In response, the Canadian and Mexican governments announced retaliatory tariffs and trade protectionist measures. The situation remains uncertain as tariffs have not yet been implemented, and further negotiations could occur. The General Partner/Manager will continue to monitor and assess the potential impacts on its business and operations. Material market disruptions, such as tariffs, retaliatory tariffs, or other trade protectionist measures, can adversely impact local and global markets and normal market operations. Such disruptions could have an adverse impact on the value of the Funds' investments and performance.

Subsequent to year end, changes in U.S. policy and administration led to announced changes in trade arrangements among the U.S., Canada, and Mexico. The potential for changes in existing trade agreements, the imposition of new tariffs, and retaliatory tariffs or greater restrictions on trade in general may lead to more significant economic and market uncertainty. Should material market changes materialize, these may impact the fund performance and underlying investments.

Related Party Transactions

Accelerate Financial Technologies Inc. ("Accelerate", the "Manager") is the trustee, manager, and portfolio advisor of the Fund. The Manager is responsible for the daily administration of the fund and for services rendered will not accept a management fee, however, will receive a performance fee. Performance fees are paid quarterly to the Manager.

Accelerate has decided to cover the costs relating to the inception of the fund and other ongoing expenses (for a temporary period). The Fund will incur performance fees, expenses related brokerage expenses and commissions, income taxes, withholding taxes, any applicable harmonized sales tax ("HST"), goods and services tax ("GST") or other sales taxes.

Performance Fee

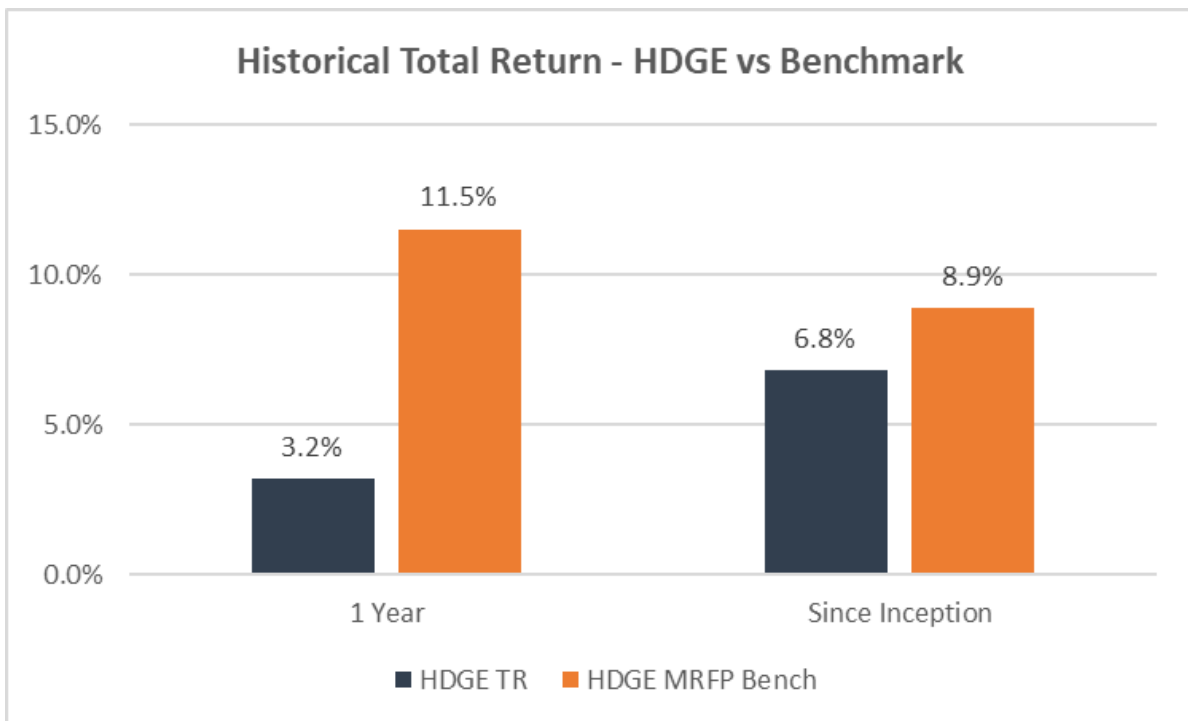

As previously stated, the Fund does not incur a management fee for the service provided by the Manager. The Fund pays a performance incentive fee, plus applicable taxes, to the Manager equal to 20%, of the amount, if any, by which the NAV per Unit as of the last Valuation Date at the end of a calendar quarter (before giving effect to any distribution made by the Fund, as the case may be, since the applicable High Water Mark was determined, and adjusted to exclude the accrual of the performance incentive fee during the calendar quarter) exceeds the applicable High Water Mark, multiplied by the number of Units of the Fund, as the case may be, outstanding at the end of that calendar quarter. The

applicable High Water Mark is reduced by the amount of any distribution paid in respect of Units of the Fund, as the case may be, during the calendar quarter. If no performance incentive fee is paid by the Fund, as the case may be, for 12 consecutive calendar quarters, the applicable High Water Mark is reset to the NAV per Unit determined as of the last Valuation Date of that 12th calendar quarter.

Each performance incentive fee is calculated and accrued daily and paid quarterly. If any Units of an Accelerate Fund are redeemed prior to the end of a calendar quarter, a performance incentive fee is payable on the redemption date in respect of each Unit that is redeemed, as if the redemption date were the end of the calendar quarter, as described above.

Past Performance

The following chart represents the performance of the fund versus its benchmark, a one year period from December 2024 to December 2025. The Fund's units were available since May 10, 2019.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help readers understand the Fund's financial performance for the period indicated.

Accelerate Absolute Return Fund

Financial Highlights

For the years ended	2025-12-31	2024-12-31 ¹
Net assets attributable to holders of redeemable units per unit, beginning of the year ²	26.95	22.46
Increase (decrease) in net assets attributable to holders of redeemable units:		
Investment income	0.61	0.69
Total expenses	(0.81)	(1.26)
Realized gains (losses) for the year	(0.11)	1.78
Unrealized gains (losses) for the year	1.00	2.77
Total increase (decrease) in net assets attributable to holders of redeemable units³	0.69	3.98
Distribution to holders of redeemable units per unit:		
Return of capital	0.40	0.40
Total distribution to holders of redeemable units	0.40	0.40
Net assets attributable to holders of redeemable units, end of year²	27.40	26.95

Ratios & Supplemental Data

Net assets attributable to holders of redeemable units, end of year (\$) (000's)	41,098	41,769
Number of outstanding redeemable units (000's)	1,500	1,550
Net Assets attributable to holders of redeemable units per unit (\$)	27.40	26.95
Management expense ratio ⁴ (%)	1.46	3.95
Management expense ratio before absorption	1.46	4.15
Portfolio turnover rate ⁵ (%)	321.50	385.77
Trading expense ratio ⁶ (%)	1.36	1.05

1. The information shown in this column is for the year ended December 31.

2. The financial highlights are derived from the financial statements prepared in accordance with IFRS. IFRS allows net assets to be calculated based on the last traded market price for financial assets and financial liabilities where the last traded price falls within the day's bid-ask spread.

3. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The total increase (decrease) in net assets attributable to holders of redeemable units is based on the weighted average number of units outstanding over the financial year.

4. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average net asset value during the year.

5. The ETF's portfolio turnover rate indicates how actively the ETF's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher a portfolio's turnover rate in a year, the greater the trading costs payable by the ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.

6. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year.

Forward-Looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates” or negative versions thereof and similar expressions. Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in Canada, United States and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events. Please note this is not an exhausted list of factors. Careful consideration of these and other factors should be made before making investment decisions and urge investors to avoid placing undue reliance on forward-looking statements.
