About the Fund

The Accelerate Arbitrage Fund (TSX: ARB) provides exposure to SPAC arbitrage and merger arbitrage investment strategies. The Fund aims to generate consistent, low-volatility returns by investing in listed equity, debt or derivative securities of target companies involved in mergers or corporate actions, while selling short certain listed equity, debt or derivative securities of acquiror companies involved in mergers or corporate actions, where applicable.

What is SPAC Arbitrage?

SPAC Arbitrage is an investment strategy that seeks to acquire shares or units of a special purpose acquisition company ("SPAC") at or below its net asset value ("NAV") in order to generate a return through either:

- an exit at a premium to NAV once the SPAC announces a business combination
- an exit at NAV, being the IPO price plus accrued interest, through a redemption before the deal vote or through the liquidation of the SPAC

What is Merger Arbitrage

Merger Arbitrage is an investment strategy that capitalizes on the spread between a company's current share price and the consideration paid for its acquisition in light of an announced merger transaction. The merger risk premium— or the spread between the acquisition price and the trading price of a stock—compensates the arbitrageur for the risk of the acquisition failing to close. The merger arbitrageur's goal is to "lock in" the spread earned upon deal closing and to profit from buying a takeover stock at a discount to its acquisition price.

Five key steps are followed when selecting deals and executing trades in ARB:

- Deal Evaluation and Selection
- Execution
- Risk Management
- Deal Monitoring
- Position Sizing

Investment Objectives

- Outperform the S&P Merger Arbitrage Index
- Generate consistent, low-volatility returns
- Provide an attractive distribution yield
