About the Fund

The Accelerate Carbon-Negative Bitcoin ETF (TSX:ABTC or ABTC.U) seeks to provide investors with exposure to the performance of bitcoin by investing in CME bitcoin futures. Accelerate intends to sequester over 100% of the estimated carbon dioxide emissions attributable to bitcoin transactions that ABTC is indirectly exposed to by funding decarbonization initiatives including its global tree-planting program.

Who is the ETF For?

- Investors who want exposure to the performance of bitcoin in an eco-friendly way; and
- Can tolerate a high level of investment risk.

How Does it Work?

- ABTC holds bitcoin derivatives
- Implements a decarbonization initiative through a global tree-planting campaign
- For every CAD \$1,000 invested, an estimated 1 net tonne of carbon emissions is sequestered

Investment Process

To provide investors exposure to the performance of bitcoin, the fund invests directly in CME bitcoin futures,

- CME Bitcoin Futures are designed to provide exposure to the performance of bitcoin and are traded in USD.
- CME Bitcoin Futures are listed and cleared on the Chicago Mercantile Exchange, a U.S.-registered designated contract market and derivatives clearing organization.
- The trading and clearing of CME Bitcoin Futures is regulated by the Commodity Trading Commission, the regulatory body with exclusive jurisdiction over U.S. bitcoin futures markets.

Bitcoin Historical Return

DISCLAIMER: ABTC provides exposure to bitcoin through futures and saves the planet by supporting decarbonisation initiatives. See our prospectus for further details. What Makes ABTC Eco-friendly?

Bitcoin miners are expected to consume roughly 130 Terawatt-hours of energy (TWh), which is approximately 0.6% of the global electricity consumption. ABTC green for four reasons:

1. No Blockchain

We trade bitcoin futures, which consumes a fraction of the energy of mining bitcoin. Each bitcoin bought through futures is one that doesn't need to be mined.

2. Decarbonization Initiative

We have a tree-planting campaign to neutralize carbon emissions and help fight climate change. Up to 10% of our management fee will be allocated to our annual tree-planting campaign.

3. Independently Verified

We work closely with a third-party sustainability consultant, helping us efficiently track energy use and emissions, allowing us and our investors to achieve a sustainable investing experience.

4. Professionally Managed

We use a tree-planting management platform that enables us to monitor projects effectively. It is designed specifically to manage large-scale projects, allowing us to provide data to clients regarding the status of their sustainability efforts.

ABTC Can Benefit You In Two Ways

1. It can diversify your investment portfolio

2. You can fight climate change by investing in bitcoin

Visit www.InvestABTC.com to calculate how many trees your investment will plant or how much carbon footprint is offset by your investment.
